

# Nursery Remote Learning Sorting by Size and Colour

## You will need

Assortments of coloured and different sized buttons or other objects, 3 glass jars or containers, 3 labels with big, medium and small, colour labels.

## What to do

Place the coloured labels on one side of the jars and the big, medium and small labels on the other side of the jars. Sort the objects by size. Talk about each one, which is biggest and smallest? Encourage language such as, "this one is bigger than that one." Sort the objects by colours, discuss the different shades. Are there any coloured objects that do not belong? Talk about which jar has the most in it.
