Pre-Nursery Remote Learning
Ball Ramp

You will need
A large piece of cardboard, a broom and tape, balls and a target

What to do
Cut open the box so it is flat, then fold back the flaps and tape them down. Tape a broom stick to the back, that's the trick, it makes the ramp part nice and sturdy. For the bottom of the ramp fold it up to make a curve just like a ski jump ramp. Keep track of which balls jump the farthest, put them in order. Try rolling other items, which work best?
