

# Curriculum and Assessment Policy 2023/2024

'Every child deserves the best possible start in life and the support that enables them to fulfil their potential. Children develop quickly in the early years and a child's experiences between birth and age five have a major impact on their future life chances. A secure, safe and happy childhood is important in its' own right. Good parenting and high-quality early learning together provide the foundation children need to make the most of their abilities and talents as they grow up.'

Statutory framework for the Early Years Foundation Stage 2021

#### **Our Vision and Values**

We put the children's learning at the heart of everything we do so that they can explore, discover and make sense of the world, make choices, develop independence and learn the skills of social interaction, develop an appreciation of their learning environment and treat it with respect, develop self-esteem, self-confidence and a sense of their own identity.

We provide a caring and supportive environment in which the contributions of all children are valued enabling them to fulfil their potential.

We are an inclusive setting that appreciates the uniqueness of the individual child, regardless of ability and experience, and the wonderful diversity of the local community.

We celebrate the successes of all individuals no matter how small, to develop a committed and appreciative learning community.

We establish dynamic, innovative and creative practice based on research into how young children learn.

We involve the whole community in the day to day life of the school to enrich the children's learning opportunities.

We commit to the professional development of all staff to extend their knowledge, understanding and skills of Early Years education to build capacity and secure continuous school improvement.

We maximise the interdependent relationships of all adults and children involved in the setting enabling us to work together to secure the best possible outcomes for children.

#### **Our Principles**

#### The four principles of the EYFS underpin our Curriculum:

- **A Unique Child** every child is unique and develops in different ways and at different rates; they are constantly learning and have the capacity to be resilient, capable, confident and self- assured.
- Positive Relationships children learn to be strong and independent through key person relationships which are warm and loving, sensitive, responsive and supportive.
- **Enabling Environments** which offer stimulating resources and spaces, inside and out and rich learning opportunities where children can take risks and explore.
- **Learning and Development** practitioners teach children through both child-led and adult-led experiences through quality interactions supporting each next step of learning.

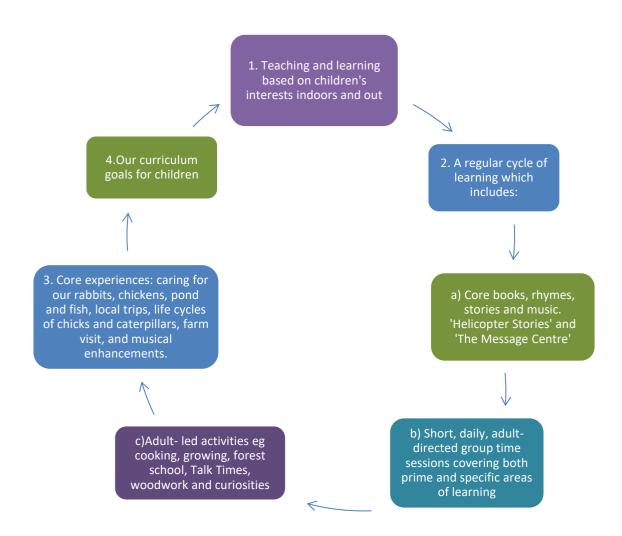

## Education for children's futures requires supporting children's ability to learn and to think for themselves. The Characteristics of Effective Learning describe how children learn:

- Playing and exploring we provide experiences and interactions that respect children's ideas, autonomy and interests. They follow their own curiosity and learn to develop their own challenges.
- Active Learning we provide time, space and resources; we foster children's growing powers to concentrate with deep involvement.
- Creative and thinking critically we provide play opportunities and adult planned experiences, to allow children to think of their own ideas, imagine possibilities and creatively combine ideas in spontaneous ways.

#### **Curriculum Overview**

We offer a high quality broad and balanced curriculum which has four main elements:

1. Teaching and learning based on children's interests

All aspects of our curriculum require practitioners to be flexible and take account of children's interests and starting points.

We're able to do this because we know our children well. We gain a thorough understanding of our children's interests and how they learn through liaising with parents, each other and observing and interacting with children.

2. A regular cycle of learning

Our curriculum reflects the needs and interests of our children at Maidenhead Nursery School, and we plan to broaden and deepen those interests both at Nursery and in the local community.

3. Core experiences: gardening, nurturing chicks and caterpillars, seasonal walks, celebrating our diverse community

We extend the children's learning with our interactions during free flow. Our adult-led group times also build on the children's current interests and learning. Our group times follow a progressive model of teaching and learning. We have yearly curriculum overviews, long, medium and short-term plans which build on the children's developmental skills.

4. Our curriculum goals for children

All aspects of our curriculum build on children's development. For example, our cycle of core books begins with simple repetitive texts. Over time our core books contain more complex vocabulary, structure, and themes.

Our curriculum goals encourage the acquisition of lifelong skills and an appreciation for the world around us ready for the next phase of education.

Parents – in this document means parent/ carers.

#### **Learning at Maidenhead Nursery School**

Our Federation principles and the Characteristics of Effective learning underpin our curriculum.

(see page 3)

We have planned a broad and balanced curriculum based on the 7 areas of learning of the EYFS and development. These are:

3 Prime areas: Communication and Language, Personal, Social and Emotional Development and Physical Development.

4 Specific areas: Literacy, Maths, Understanding The World and Expressive Arts and Design.

We have progressive and ambitious long term, medium term and short term plans in place for all curriculum Areas.

We have 10 specific curriculum goals with developmental learning across all curriculum areas which teach key knowledge and skills. These are adaptable and change depending on the cohort of children.

We designed our curriculum with the needs of children at Maidenhead Nursery School in mind, ensuring that our children learn about the diverse community within Maidenhead. We will celebrate this diversity, encouraging children to be proud of who they are as well as learning about equality, inclusion and developing a positive attitude to difference. We have carefully selected books to ensure they reflect our community, supporting children to feel represented and valued.

We offer children daily, first hand experiences as we feed, water and care for our chickens, rabbits and fish. Taking food waste to our wormery and seeing it transform into compost for our allotment allows the children to learn about sustainability and preventing unnecessary waste.

We ensure that all children have access to enrichments and tailor experiences accordingly, using visits to places in our local community as well as curriculum enhancements in the Nursery.

We plan special activities throughout the year such as our farm visit, musical enrichments, local trips out, forest school activities and learning about life-cycles. These activities provide children with the foundations to further explore our world around them with all its diversity and wonder.

#### **Implementing Our Curriculum**

Most learning is child-led and play-based in our indoor and outside environments.

There is a balance between adult-initiated experiences (guided learning) and child-initiated experiences.

Adults take children's interests and strengths, seeing each child as a competent learner.

Parent involvement is crucial. We learn a great deal about each child from their parents. Parental support and a high-quality home learning environment make an enormous difference to children.

At Maidenhead Nursery School we value experiential play. We plan rich and challenging activities and experiences for awe and wonder, designed to spark children's curiosity, engage them and encourage sustained shared thinking. We plan for and organise adult led weekly 'Talk Times.' We set up an irresistible collection of items to explore, we bake, cook on the fire and observe first-hand the life cycles of caterpillars and chicks. These planned experiences ignite children's interest and use of a rich and varied vocabulary.

We offer lots of learning outdoors to build children's confidence and physical strength and co-ordination, for example through forest school activities, the mud kitchen, physical play equipment and woodwork.

Our environment develops throughout the year, for example we begin with simply joined construction materials and progress towards more complex sets alongside our loose parts.

Our environment is consistently and carefully planned to reflect and optimise progress and improve outcomes. Children learn a huge amount through the play they choose. Adults help to maximise this learning by making sure that we provide a high-quality learning environment, indoors and out. We might plan to keep a particular part of the provision the same to allow a child more time to explore and master a skill, or if a child has reached a particular milestone in a curriculum goal we can introduce a new resource that allows the child to progress onto the next stage of learning. We need to be flexible to ensure both the curriculum and child-initiated learning is included.

We balance teacher-initiated and teacher- led learning with child-led learning. 'Free Flow' is when children are engaged in play both indoors and out. Children engage in the environment, with each other and with us. We are observing, assessing, planning for and responding to individual or groups of children all the time. As a staff, we discuss individual children regularly so that we all know how best to support each child's learning and development.

The Ofsted definition of teaching is very useful in supporting staff to recognise the teaching that they are doing through interactions and through the enabling environment. Teaching includes communicating and modelling language, showing, explaining, demonstrating, exploring ideas, encouraging, questioning, recalling, providing a narrative for what they are doing, facilitating and setting challenges (Ofsted 2015)

We are an Attachment Aware school and pride ourselves in our knowledge of the developing brain and how to support young children's well-being through understanding and managing their feelings and behaviour. The well-being and involvement levels of the children are important to us and we monitor and support this area of their development individually.

We offer scaffolding and extra support to help every child to access the curriculum and to ensure they make progress and achieve the best possible outcomes. However, we recognise that every child will not make the same progress through the curricular goals. Many children will learn to hammer a nail into a piece of wood. For some children with complex needs, managing to tolerate the sound of the hammer on the wood or the feel of the goggles on their face will represent strong progress. All those children are participating in the same curriculum. Where children move on quickly, our emphasis is on deepening their learning rather than introducing new skills or concepts. For example, a child may follow different recipe cards to make other types of bread and may help other children.

It is important to note that some children will need more help and scaffolding to access the curriculum. We will decide how to support each child so that they can access the curriculum and it is important that we are certain that children are secure in what they know and can do, before introducing them to something new.

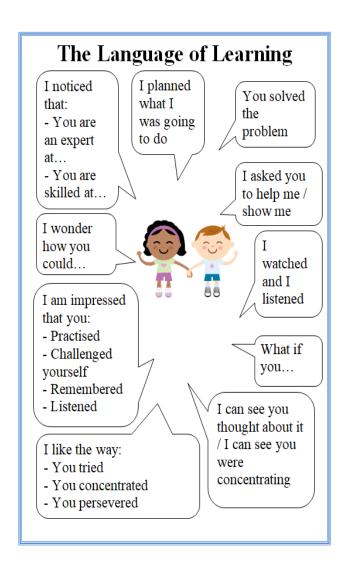

#### **Using our knowledge of Child Development**

Practitioners need to have a secure understanding of child development, as well as the features of effective pedagogy. As a team, we need to understand how the different elements of the curriculum fit together to help children build their learning over time. Reflective, regular discussions about practitioner's key children support this understanding. We spend time planning our adult-led daily group times and adult initiated learning to support progress in our 10 curriculum goals. Literacy and Maths are systematically taught during our group times as well as through our high-quality play-based learning environment. We check and assess that all areas of the curriculum are being taught and are reflected in the environment

#### Metacognitive thinking

We use the 'language of learning' with children and they quickly adopt this language as well which helps them to place value on the importance of their characteristics of effective learning, not just the end product of their efforts.

Practitioners are skilled in modelling metacognitive thinking for our children and this in turn helps children to develop a growth mindset.

Metacognitive thinking enables children to talk more specifically about thinking in different contexts. It enables children to use a 'plan do review' approach in their learning. They become independent and more powerful learners and this supports their approach to managing their own learning later in their school years. Children are able to articulate what they can do and identify what they are trying to do next.

## Our 10 curricular goals

Confidence	Become a confident learner
Communicate	Communicate what makes them special
Follow	Follow a recipe to bake a bread roll
Collaborate	Collaborate using an obstacle course
Create	Create an artwork using a range of stimuli
Care	Care for our plants, allotment and animals
Construct	Construct a model in the woodwork studio
Make up	Make up a story and act out others
Write	Write with a purpose in mind
Explore	Explore numbers using a variety of resources

#### **Children with Special Educational Needs and Disabilities**

We are committed to providing a high-quality curriculum for all our children. We believe that all children, including those with special educational needs and disabilities (SEND) have an entitlement to a broad and balanced academic and social curriculum, which is accessible to them, and to be fully included in all aspects of Nursery life. We believe that all children should be equally valued in school and we strive to develop an inclusive environment where all children can flourish, feel safe and attain the best possible outcomes.

We have curious conversations with parents and carers and seek advice from other professionals (if involved) to help inform our baseline assessments for children with SEND. The focus is to understand what the child knows, understands, and can do, and the uniqueness of their play behaviours, learning dispositions and interests which can provide strong foundations for learning and progress. Our approach ensures that every child can reach their full potential, have authentic experiences, feel a sense of belonging and be happy. This in turn allows us to support the whole family; advising, creating positive relationships, and empowering them to understand their child's learning journey.

All children are entitled to the Early Years curriculum. They will not all manage to do and know everything that is mapped out; some who appear vulnerable at first may thrive later in the year and children have different interests and experiences to build upon. Rather than 'differentiating down,' we believe that 'scaffolding up' is a positive approach in our commitment to inclusion. By 'scaffolding up,' children with SEND are exposed to the concepts and skills in our wider curriculum in a suitable breadth and depth. 'Differentiating down' suggests that children with SEND have limited access to the activities in the curriculum. Our commitment to 'scaffolding up' means that children are included in the wider curriculum and are integrated with their peers. For example, if a child has specific difficulties with their communication, for example, they may need to have aids such as a communication board so that they can make choices and share their ideas in play activities.

Woven into our curriculum we deliver strategies and activities that were initially developed to aid the inclusion of children with SEND to enable them to engage more meaningfully in what it means to play and learn with developmental differences. However, we have found that these strategies benefit **all** children, improving their communication and language

skills, social skills, self-help skills, behaviour, physical development and their attitude towards discovery, exploration, and learning. They therefore form the foundations of our provision.

Following the children's interests and their lines of enquiry is an essential curriculum driver for children with SEND. We use their motivators to create irresistible invitations to access a wider range of curricular activities.

#### **Intensive Interaction**

Intensive Interaction is used with children who have social communication difficulties. It helps to develop eye contact and early communication skills between the child and adult so children learn to enjoy being with and attending to another person.

#### **Attention Building Group Activities**

The Attention Autism programme and Let's Connect are structured small group activities aimed at developing children's attention on an adult led agenda and developing natural and spontaneous communication using visually based and highly motivating activities. The sessions aim to grab children's attention, build their attention and then enable them to shift their attention from watching, to participating by taking a turn and back to watching again. Let's Connect also requires children to make choices during the session. Despite 'autism' in the title of the programme we find the activities help all children learn how to attend to adult led group sessions.

#### Mindfulness and Yoga

Staff teach and demonstrate positions and breathing exercises promoted by yoga practice for children and basic mindfulness techniques of sitting quietly and learning to keep our bodies still and calm. There is an <a href="mailto:emerging body of research">emerging body of research</a> that indicates that mindfulness can help our children improve their ability to <a href="pay attention">pay attention</a>, to <a href="mailto:calm down">calm down</a> when they are upset, and to <a href="mailto:mai

#### Lego Therapy

Adult supported sessions where 2 children build a set Lego model together. One child assumes the role of the architect and gives instructions, either verbally or using visual supports, to build a certain model to another child, who is the builder. This helps children to socially interact with peers, sustain social interaction over a period of time, engage in paired

problem solving, take turns, wait patiently and develop joint attention on a shared challenge.

#### **Sensory circuits**

Short sensory motor skills programme involving an alerting, organising and then calming activity are encouraged at regular intervals to help improve children's ability to self-regulate and concentrate. Some children need these activities more regularly than others. Heavy work activities such as pushing, pulling, lifting carrying and transporting can also help with children's self-regulation.

#### Makaton

Makaton is a language programme using signs and symbols to help people to communicate. We use Makaton for all children and teach the children two or three signs each week. We believe all children benefit from learning to sign and it is also greatly of benefit for children who are learning English.

#### **Behaviour Management Strategies**

Please see 'Positive Behaviour Principles' in the appendix which outlines our approach.

#### **Monitoring and Assessment throughout the Year**

#### **Settling In and Initial Planning and Assessment**

- 1. In the first half term we prioritise planning for and assessing the Prime Areas of the Curriculum. Key people spend quality time getting to know their key children and their families but all the staff are involved with all the children, talking about, observing and planning to settle them into Nursery and grow in confidence in their new environment.
- 2. Our assessment begins with an initial phone call, a home visit and a session at Nursery with a parent/carer and their key person spending time together. During September all parents will receive a 'Settling In' sheet about their child at Nursery and be given the option of a phone call with their key person to discuss the initial settling in period.
- 3. Every child is offered a home visit or a call if a home visit is not possible and this is followed by a Nursery session together. Parents share information about their child's interests, communication, confidence and physical health with their key person. This information will be recorded and used for initial starting points and to build the child's interests into the planning of the provision.
- 4. Practitioners meet or call parents during the month of September to discuss how their child has settled in and what they have observed. This is a snapshot of a child's starting points. The practitioners will refer to Development Matters to check development in the Prime Areas and we will use our Communication and Language Tracker to record all children on entry to identify children who may not be showing age-appropriate skills to plan extra support if necessary. We will assess every child's well-being and measure children's engagement.
- 5. If we notice that a child may be having difficulties in their development, we will act quickly. It is important that we understand these more vulnerable children and the areas where they need support. We will continue to develop a strong relationship with the parents, working together to give their child the extra help they need. The curriculum for all children will remain ambitious and inclusive. It is important that we focus on support, scaffolding and helping children overcome barriers to their learning.

#### Our objectives for initial planning and assessment

- Dialogue with parents so that we can work in a respectful partnership to support children's learning at home and in Nursery.
- Dialogue with children focused on how they learn to promote thinking.
- Early identification of children who need extra help and children who may have SEND.
- Checking that children are making progress and taking prompt action if this is not the case.
- Reporting formally to parents to work in partnership to give each child the very best

#### Reporting to Parents throughout the year and parental involvement

Each term we ask parents/carers to come and talk with us about their child's learning and development. We ask parents to tell us about any significant events that may be helpful for us to know, take some photos of their child for their Learning Journey and then come in to talk about their child's progress. We record some of our teaching moments and their child's learning for us to discuss.

We monitor children's learning in the 10 Curricular goals to check that children are on track. We also record significant observations or 'wow moments' in the child's learning journey folder. The child's achievements and perseverance are made clear and they take great pride in sharing their folders with their friends, the Nursery adults and their families.

We track and monitor children's well-being and involvement throughout the year. This helps us to identify any children needing extra support, for example with attachment, friendships or managing their feelings. Alongside this we track and monitor all children's communication, language and speech development to ensure that additional input is provided where needed. These ongoing observations and assessments are shared regularly with parents.

We have an 'open door' policy for parents and recognise that the child's parents are their primary and most important educators. We pride ourselves on working closely with parents from the very start of their child's time with us. We do this through induction visits and meetings, home visits, termly feedback, sharing learning journeys and wow moments, weekly updates of teaching and learning, incidental discussions and an end of year discussion.

Our weekly update is emailed home in the form of photographs and an explanation

of the teaching and the children's learning during both free flow and Group Times. We share ways in which parents can support their child's learning at home which complement the learning at school.

#### An example of the weekly learning update for parents

## Our Learning

#### Weekly Update - 3<sup>rd</sup> - 7<sup>th</sup> October 2022

This week we have been soaking up the warm weather and exploring water play together. The children have used the guttering and pipes to transfer the water between the tables – problem solving together and finding inventive ways of working.

Block play has also been a fantastic way for the children to work collaboratively, using their imagination to create settings and enclosures for animals and characters in their play. Larger block play outside has enabled the children to create enclosures big enough for them to fit inside. Block play is a fun and openended activity that encourages mathematical, physical and scientific development. They have been working out what shaped and sized blocks to use and creating and identifying patterns within their structures.

#### Next Week - 10<sup>th</sup> - 14<sup>th</sup> October 2022

Next week we will be introducing our potions area indoors. The children will learn how to use the different resources such as pipettes, measuring jugs etc and tidy them away and then have an opportunity explore mixing and creating.

We will be introducing the story "Goldilocks and the three bears". We will be noticing how stories are structured, identifying the characters and settings. We will even be trying out different voices for the different characters as we repeat phrases such as "Who's been eating my porridge?!"

As we continue to tune into sounds around us we will focussing the children's attention and listening skills as we play games together to match different sounds.

Our maths mastery focus will continue to be the number a.

We will be starting woodwork next week giving children the opportunity to use our woodwork bench. They will wear safety goggles and hammer golf tees into pumpkins. This will be the start of their woodwork journey with us. Our first focus is always safety and the children are supervised throughout their woodwork session.

#### At home...

- Continue to tune into sounds around you as you move around your house or on walks. What
  can you hear? Can you identify what is making that sound? Tuning into sounds is a skill that
  will support your child on their journey to becoming a reader and writer. They need to be
  able to hear separate sounds and identify them just as they will when they need to listen to
  a word and identify the letters/ sounds.
- Have fun making potions in the bath or sink. Provide your child with different items to pour
  or scoop with, add some bubbles, soap or food colouring. Do they notice any changes
  happening? Have you ever mixed cornflour and water together? Give it a try!

## **Yearly Overview – Monitoring and Assessment**

	When	Details
Settling In and Initial Assessments	Completed within child's first 4 weeks at Nursery.	'Settling In' sheets taken and sent home.  Teacher observations of the child through quality interactions and play.  Discussions with parents and amongst the team.
Learning Maps	Our Daily planning and assessment for all children throughout the year.	Ongoing for all children. Learning Maps for each child once a term which are shared with the child and their parents/carers.
Learning Journey	On-going through child's time at setting.	Evidence of the child's learning at home and school and their interests are documented, shared and given to the child to take home when they leave.
Communication and Language Monitoring	Termly	Communication forms for all children. Discussions about individual children amongst the team. The whole team support children with speech strategies, ongoing.
POMS Well- being and Involvement	Termly	POMS records for all children.
Our 10 Curricular Goals	Recorded when achieved and added to Learning Journeys.	The children's goals are set, monitored, and achieved throughout their time with us.

### Our 10 curriculum goals

1. Become a confident learner		
Why?	Children thrive when they feel safe, valued and loved. Emotional self-regulation is a critical support for development and learning.	
First milestone: Children make a strong relationship with their key person. Increasingly, they separate confidently from their parent at the start of the session and become involved in their play. They use their key person as a 'secure base' throughout the session, 'touching base' as/when needed.	All parents are offered a home visit for their child, and a nursery visit. Induction with parents, baselines, Learning Maps and discussions throughout the year enable adults to plan from the individual children's interests Where children need individualised and additional help, this will be offered promptly. Help includes; individual meetings with parents to map a way forward, Early Help support for parenting; Triple P parenting strategies. Adults demonstrate how to manage conflict and resolutions and support the children positively with this. As children grow in confidence, their involvement in nursery activities deepens. They explore a wider range of activities. They play for longer periods of time.	
Component	Spend time at Nursery managing their emotions with support.	
<b>Second milestone</b> : Children take part in pretend play, communicating and negotiating with their friends.	Children play alongside friends before they play collaboratively. They develop their 'pretend play'. As children's engagement and perseverance grows, they either challenge themselves with more difficult activities, or they respond positively to adults challenging them.	
Component	Spend 5 minutes or more in pretend play with another child.	
<b>Third milestone</b> : Children persevere with difficulties. They comment on their play and Learning Journey showing pleasure and pride in what they have done.	As children play and learn more collaboratively, over longer time periods, and take part in more challenging activities, they talk about and reflect on their learning.	
Component	Talk about what they are doing or have done, reflecting on their learning.	
<b>Final milestone</b> : (Composite) Children reflect on their learning in conversations and when looking at their Learning Journeys. They are ready for learning. They comment on their thinking and the ways they go about their learning. They reflect on what helps them to persevere through difficulties and what helps them when they find things hard. Children show they are developing their metacognition.		

Vocabulary: persevere, challenge, expert, confidence, collaborate, practise

2. Communicate what makes them special		
Why?	We nurture children towards having a high self-esteem and an appreciation of diversity and the wider world.	
<b>First milestone:</b> Children can make a choice based on their interests, likes and dislikes and know that they can communicate no. They can identify their family.	Children are encouraged to bring in a photograph of their family from home to display in their group corner.  The children are encouraged to make their own choices from a range of high-quality activities and resources.	
Component	Share a family photo.	
<b>Second milestone</b> : Children can act out family experiences that are familiar to them.	Resources that reflect the children's home lives are shared in nursery. Dressing up materials are generic drapes rather than set costumes to allow for different interpretations. Festivals and celebrations are shared and explored such as Diwali, Eid, Hanukkah, weddings, Christenings, birthdays and Christmas.	
Component	Share a special occasion.	
Third milestone: children can notice differences and similarities such as skin colour, gender, types of hair special needs and disabilities in picture books and within the setting and wider community.  A wide range of children's books which reflect our diverse society are an integral part of nursery and are available for the children to take home.  Our diverse community is shared through multicultural activities and visiting parents and groups such as drummer and dancers.  Adults use books and resources such as "Who are you?" when discussing differences and similarities.		
Component	Communicate something which is similar and something which is different about themselves and someone else.	
<b>Final milestone</b> : (Composite) Children can recognise the difference and similarities between themselves and their peers. Children care for and respect others and know how to make them feel better. They can communicate what they are good at, what they are an expert in and what makes them unique.		
Vocabulary: special, similar, different, expert, unique		

3. Follow a recipe to bake a bread roll	
Why?	We want to instil a love of cooking in our children whilst developing the ability to work independently and follow instructions in sequential order.
<b>First milestone</b> : With adult support, children mix different ingredients, including; sand and water, and flour and water to make simple playdough. They use the following tools; wooden spoons, sieves, scoop, rolling pins, cookie cutters and knives.	Children use a wide range of different-sized buckets, tins and other containers. With adult support, children have opportunities to mix two or more substances together and observe the changes they see. Children become confident in using tools at the snack table to prepare their own snack e.g. spreading butter on toast.
Component	Mix 2 or more substances together using tools.
<b>Second milestone</b> : In a small group, the adult uses a recipe card and draws children's attention to the use of measures (teaspoon, tablespoon, cup etc) in particular focussing on capacity, volume and quantity i.e. how large the container is, whether the measure is full, half full, empty, and how many are required.	As children take part in these activities, they become more precise in using scoops (filling the scoop carefully to the top); sometimes with adult help they count the scoops as they tip them out.
Component	Follow all the steps on the recipe card with support.
<b>Third milestone</b> : In a small group, children follow the steps in making dough with an adult. Children use measures (teaspoon, tablespoon, cup etc) and tip in the ingredients. With adult help, they knead the flour until it becomes soft and cover it. They roll the dough into small balls and flatten. They reflect on the process and observe the changes once cooked.	As children become more used to cooking, the adult reduces their support for the group as they follow recipe cards.
Component	Fill measures accurately to the top.
<b>Final milestone</b> : (Composite) In small group cooking activities, children follow the steps in making a bread roll with an adult, filling measures carefully to the top (teaspoon, tablespoon, cup etc). They recognise the numerals on the recipe card. When they count out quantities (e.g., 3 teaspoons of salt) they say the numbers in the correct order (1-2-3) and they know the last	

teaspoons of salt) they say the numbers in the correct order (1-2-3) and they know the last number they say (3) is the total number of spoonfuls they have added.

**Vocabulary:** recipe, smell, instructions, ingredients, measure, full, empty.

4. Collaborate using an obsta	cle course
Why?	We want our children to gain social and communication skills by collaborating on a project whilst gaining confidence through reaching physical milestones that focus on gross motor skills.
<b>First milestone</b> : With adult support, identify safe equipment for building outside and begin to explore their own physical capabilities.	The children can begin with smaller resources such as wooden blocks. Larger equipment can be introduced and explored as the children become more confident and capable and their core strength and balancing skills develop.  Children begin to communicate to an adult
	about what that they are doing with adult support.
Component	Access climbing areas independently and communicate what they are doing to an adult.
<b>Second milestone:</b> With at least one other friend gather equipment to build a structure/ obstacle course and	Adults ask questions and verbalise thinking, modelling the process of 'what should we do and how should we do it?'
demonstrate to others how to use to it.	Adults verbalise the process of making and using the equipment to scaffold children's learning.
Component	Build with one other child or more, with adult support.
Third milestone: In a small group, use larger construction, developing their ideas and focussing on 'does it feel/look safe?' Begin to plan and communicate their ideas firstly with adult support and then more independently.	Adults provide examples of structures to inspire Children are encouraged to explain their thinking, reflect and consider improvements, first to adults and then to a friend. Children start to communicate with each other as they design and build.
Component	Build and use an obstacle course with others. Communicate what they want to build, what they are doing, and why.

**Final milestone:** (Composite) Children demonstrate strength, balance and coordination when climbing independently. Children build a safe, solid structure which is planned and built collaboratively from a range of equipment where the children must use a variety of physical skills to move around the course.

**Vocabulary:** design, structure, collaborate, communicate, stable, secure, safe, help

5. Create an artwork using a	range of stimuli
Why?	We want to foster a love of art and creativity in our children. We want children to learn to express their own ideas using their curiosity and imagination.
<b>First milestone</b> : Children learn how to use and look after the creative area. They will begin to access the creative area with adult support, experimenting with using the resources. They will use small paint brushes to apply a variety of colour paint. They will be able to put their pictures on the dryer.	Group times will be planned to introduce specific skills and materials. Children are shown where they can access the creative resources, including moveable parts, how to use the tools such as paint brushes and glue sticks and the collage materials. Children will be able to experiment freely with the range of resources, sometimes using one type of medium and other times layering their painting with collage materials and pastel crayons for example. There is no need for a planned end outcome, rather an opportunity to experiment and learn what everything does, how it feels and how it can all work together to produce a piece of art.
Component	Access resources in the Creative Areas to produce a piece of art with adult support.
Second milestone: Children become more independent at accessing creative resources during free flow. Children build up their experience of using a range of materials so that some may begin to plan for an end outcome and consider how they may want their art to look.  Children will be shown how to join card and plastic modelling materials together to	Children will choose to use our creative areas independently. Areas will be well stocked allowing the children free choice of all the resources. Children may need reminding to clear away and clean the equipment after use.  Children will have free access to scissors and masking tape, glue and other joining materials.
begin to build 3d art.  Component	Create by joining or arranging 3d art materials
Third milestone: children will be exposed to a variety of artists and their work, highlighting the techniques that the artists use. Children will experiment with those techniques and media and with adult support will begin to use the influences in their own art work.	together.  Every child will have an opportunity to experiment with various artistic styles during Group Time and artist's art work will be available to the children during free flow to inspire and talk about.
Component	Communicate about what you want to make and create it.
<b>Final milestone</b> : (composite) children in have learnt to create pictures or models.	ndependently use a variety of techniques they
Vocabulary: technique, artist, style, crea	te, materials, manipulate

6. Care for our plants, allotment and animals		
Why?	Being in touch with the natural world is important to our well-being and understanding lifecycles, how food grows and minimising waste is now an essential part of our lives as humans. If we immerse children in regular, daily, first-hand experiences then natural science becomes immediate and relevant. We want our children to notice, value and care for the natural world around them, developing a deep respect for nature.	
First milestone: Children become familiar with animals and help take care of them with adult support.	Children are introduced to the chickens, rabbits and fish who live at nursery and follow instructions of how to take care of them including filling up water and food. They learn to respect them as they stroke them gently and speak quietly. They will join an adult to look for and collect eggs.  They learn that they must clean their hands after handling food, cleaning or touching animals or eggs.  Children help to feed the animals.	
Component	Take care of animals with adult support.	
Second milestone: Children observe animals and plants closely. They notice and talk about the features of animals, plants, minibeasts.	Children have repeated experiences and are able to observe animals, plants, and the environment closely.  Adults will support them to develop their knowledge as they closely observe, notice and can talk about features.  Adults will teach skills and knowledge through practical activities such as cooking eggs collected from our chickens or observing ice melting outside.	
Component	Observe and name features of the natural environment (such as plants, herbs, leaves, insects) within the Nursery garden.	
Third milestone: Children are introduced to lifecycles of our animals, minibeasts and plants. They can talk about how to take care of them.	Children have many experiences of lifecycles throughout their time at nursery. Children plant a bean and observe changes and growth. They watch and follow closely the metamorphosis of creatures including caterpillars and tadpoles. Adults will provide additional resources, books and interactions to support children to learn about growth, development and decay.	
Component	Understand lifecycles of plants and animals and how to take care of them.	
<b>Final milestone:</b> (Composite) Children have the knowledge and skills to care for some animals and plants within the nursery, understanding that they must be fed, watered and treated gently to survive and grow. They will be able to talk about features of the natural environment within the Nursery garden and the lifecycle of chickens, minibeasts and plants.		
<b>Vocabulary</b> care, chickens, rabbits, fish, caterpillar, butterfly, change, grow, life cycle.		

7. Construct a model in the woodwork studio		
Why?	We want children to be able to plan, construct and learn to handle tools confidently and safely. We want them to be able to take risks, to explain their choices and talk about what they have made and how they have made it.	
First milestone: Children undertake woodwork induction with 1:1 support.	Children will learn the rules of the woodwork area: how to stay safe by wearing safety glasses when tools are in use. They will see where things are kept and how to store them safely. Under close adult supervision children will be taught how to hammer a tee into a pumpkin or a nail into a piece of wood.	
Component	Hammer a golf tee into a pumpkin or a nail into a piece of wood.	
<b>Second milestone</b> : Children independently access woodwork. New tools are introduced, with an adult, e.g. hand drill, screwdriver, saw.	Children access the woodwork bench and explore using the hammer and nails when an adult is close by. New tools are introduced with adult supervision such as hand drills and a saw.	
Component	Control a tool safely and use different materials.	
Third milestone: Children have repeated experiences at the woodwork bench. They think about what they are creating and how they want it to look e.g. "I'm making a car; it has four wheels."	With support children use tools safely and with increasing confidence. They have an idea of what they want to make and how they want it to look. They may draw plans as they wait to access the woodwork area.	
Component	Communicate what they plan to make, in advance or during the making.	
<b>Final milestone</b> : (Composite) Children decide on the model they will make. They may draw a plan of their model. They choose the materials they want to use, arrange materials with tools, and join materials together.		
<b>Vocabulary</b> safe, materials, design, plan, create, tool, choose, select		

8. Make up a story		
Why?  First milestone: Children join in with role-	Reading and Writing float on a sea of talk. We want our children to understand story structure so that they can make up, perform and tell stories. We want to ignite their interest in stories to build a firm foundation for their literacy learning.  The Nursery environment has lots of	
play and play imaginatively with 'small world.' Children join in with repeated refrains from well-known stories.	opportunities for children to play imaginatively. Stories are read for children to join in with, repeat phrases and 'act out' parts using facial expressions and hand movements.	
Component	Join in with repeated refrains/ actions in a well-known story.	
Second milestone: Children take part in interactive reading. They respond to features of the story. Children join in with the group, using the resources to make up stories together.	Adults read core books over the term. As children become more used to interactive reading, they ask questions and make links between what happens in the story and their own experiences. Adults highlight exciting story language to use later in their own storytelling.  Children are introduced to the concept of character, setting, problem and solution with interesting resources, actions and songs.  Groups make up stories together each week.	
Component	As part of a group make up a simple story with character, setting, problem and solution.	
Third milestone: Children tell stories that they have made up. They retell well-known stories using props/ picture books. Children begin to become familiar with the way stories are structured.	Adults begin to scribe stories that the children have made up. This can be continued in group time and during free flow.  Story sequencing resources are available in free flow to inspire children to create stories together.	
	Adults read stories, discussing the characters, setting, problem and solution, modelling a variety of story language.	
Component	Children begin to make up their own stories in free flow	
<b>Final milestone</b> : (Composite) Children use the available resources to make up their own story developing the character, setting, solution and problem.		
Vocabulary characters, repeat, sequence, imagine, perform, audience, beginning, middle,		

end, next.

9. Write with a purpose in mi	nd
Why?  First milestone: Children begin to use mark-making equipment independently.	We want children to see themselves as writers and use mark making, symbols and letters in their play as a way of communicating to others.  Adults use group time and play opportunities to model writing every day, highlighting its meaning. Adults make sure that print, books, and mark-making resources are everywhere. As children watch adults modelling writing for a purpose, are read to and see print around them that is read to them; when they have exciting resources with which to mark-make, they will begin to really value writing and will want to have a go themselves.
Component	Use mark making equipment independently
Second milestone: Children will have access to a variety of paper to mark-make and write messages to take home or deliver to a member of staff or another child. Children's messages may also take other forms such as chalk outdoors — using arrows to lead children to a message at the end of a trail.	Adults will model writing for different purposes and read writing from left to right and top to bottom, running their finger under the words. Adults will show print has value and meaning and will support children's own writing attempts.
Component	'Write' a message to others.
Third milestone: Children develop an increasingly wide range of purposes for mark making and early writing to support their play such as making signs, letters, cards, tickets and maps. Children will begin to imitate adult's writing by producing continuous lines of shapes and symbols.	Adults plan activities that focus on collaborative and purposeful mark making and early writing. Children will start to use vertical lines, circles and zig zags to imitate writing from left to right and 'read' what it says.  Adults support children in taking their learning into their own play.  Children in taking their learning into their own play.
Component	Use writing type marks independently
<b>Final milestone</b> : (Composite) Children choose to write in a range of play situations with a purpose in mind, making letter-type shapes and attempting some recognisable letters from their own name.	

10. Explore numbers using a variety of resources		
Why?	We want children to become confident with numbers to 5 and the relationships between them and the patterns within them.  The skill of subitising and using 5-frames builds up children's knowledge of Number and Number patterns.  We want to lay a firm foundation in 'The Five C's' — cardinality, conservation, counting, comparison and composition. We want children to experience bigger numbers and begin to relate their knowledge of them to build up firm foundations within our number system.	
<b>First milestone:</b> Children begin to subitise and can answer the questions 'what do you see and how do you see it?'	Children learn to subitise up to 3 counters and know that they are 'subitising' when they can see how many without counting. Adults do lots of noticing with children – mathematical vocabulary is used.	
Component	Can subitise to 3. Children talk about number.	
Second milestone: Children can show the different quantities on a 5-frame using subitising and handle and partition groups of similar objects (part/whole). Children build up an image of what amounts look like (pictorial image). Children join in with number rhymes, saying some numbers in sequence. Children can count objects, actions, and sounds in a short sequence.	Children use counters on five frames and begin to understand the concept of one more. Children explore larger groups of objects — and can talk about what they see within a larger group (part/whole). They build up a picture of what totals look like using a variety of resources including Numicon.  Children recite numbers past 5. They count things such as sounds and jumps.  Adults introduce, model and children join in with a range of number rhymes with props e.g. Five Green and Speckled Frogs, Five Little Ducks, One, Two, Three, Four Five	
Component	Children explore number within 5 and build up a range of number skills.	
Third milestone: Children relate their knowledge to a range of 'real life' situations – e.g. getting the right number of cups for the children at snack time.  They can show you numbers to 5 and up to 10 on their fingers, with counters and using Numicon tiles. They know that when you add more objects to a group the total increases.  Children recognise Numicon to find and explore them.	Children are given learning opportunities to see what totals are made up of e.g. 5 is 4 and 1 and 3 and 2, 2 and 1 and 1 and 1. (Part, whole)  Children experience moving objects in different ways and realise that the number stays the same even though the resources have moved. (Move it to prove it) Children count out amounts from a larger group in real life contexts and use a variety of resources when counting to represent numbers.  Numerals are used to represent amounts to 5.	
Component	Children start to use their Number knowledge throughout the Nursery, seeing connections with what	
they have learnt at group times.  Final milestone: (Composite) Children use, talk about and apply knowledge of cardinality, counting, comparison, conservation and composition in different play and real life situations.  Vocabulary subitise, total, more, next, estimate, accurate, pattern, same, different.		

#### **Our Behaviour Policy.**

#### We want...

- a safe and secure environment where all children and adults are valued;
- positive behaviour management techniques and specific praise to underpin all our strategies in the early years;
- rewards and sanctions to maintain positive behaviour patterns and safe routines;
- all individuals to feel respected and included, regardless of gender, race, religion, ethnicity, background, family or social circumstances;
- children to be free from judgements whether based on previous behaviour or the behaviour of other family members;
- an effective learning environment that stimulates, motivates and engages all children;
- team members to be confident in pre-empting potential triggers that could lead to the occurrence of undesirable behaviour;
- positive interactions with children and close monitoring of situations that could cause conflict;
- good management and support from team leaders to ensure practitioners are able to manage situations to the best of their ability;
- adults to be effective role models being kind, empathetic, tolerant, gentle, patient, supportive and understanding.

To achieve these outcomes we will introduce, reinforce and consistently follow our three rules;

#### ready, respectful and safe, in order to:

- give children positive, clear, consistent instructions with visual supports;
- reach the eye level of the child and maintain eye contact when giving instruction or addressing behaviour;
- set clear and consistent boundaries and use a firm but fair tone when necessary;
- praise children making praise explicit "praise in public", ensuring children who are behaving appropriately receive the attention they deserve, using praise of others to motivate those less eager to respond. Verbally acknowledge when individual children go "above and beyond" our expectations;
- understand that these are the first steps in very young children's learning, and respond appropriately to their mistakes allowing them a safe place to make mistakes without humiliation;
- avoid labelling children;
- be discreet and limit children and adults overhearing any interactions addressing behaviour

   "reprimand in private";
- use cue cards, photographs, etc., that continually refer back to the nursery rules so children are clearly aware of expectations;
- in order to have ownership of them children are actively involved in the discussion of and application of Nursery rules;
- engage and involve children positively in activities that they will readily enjoy to avoid confrontation and boredom;

- provide a stimulating environment where children can make their own decisions and choices;
- set small achievable challenges that enable children to feel intrinsically proud of their own achievements, thus encouraging positive behaviour;
- employ the use of our behaviour script "I noticed that...it's the rule about being ready/respectful/safe...what could you do now/instead? Thank you for listening";
- discuss concerns about any persistent behaviour problems discretely with team members (as appropriate) but never openly discuss concerns in front of the child or other children.
   Observe for underlying causes of undesirable behaviour – are there any triggers, patterns, sensory needs, etc.;
- inform parents of any issues, arrange a meeting to discuss positive behaviour strategies (use
  judgement about what is important to discuss with parents avoid bombarding parents with
  a daily list of bad behaviour, remember to chat to parents about all the positive aspects of
  the child's day too);
- employ positive behaviour strategies first (engaging child, giving praise for appropriate behaviour, setting clear boundaries, ignoring inappropriate behaviour but not the child).
