

Our Learning

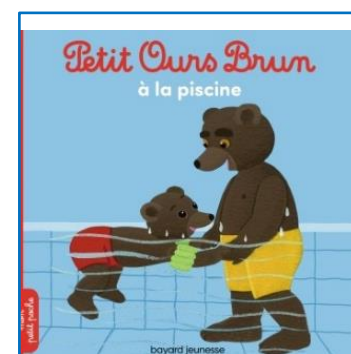

This week – 4th – 8th March

As we continue to see new flowers and plants popping up in the warmer weather, we have been excited to plant our own seeds this week. The children learnt that the seeds we planted need soil, water and sunshine to grow. We will all take care of them inside until it is warm enough for them to be planted in our allotment.

It was fantastic to see so many of you for our Come and Read session, thank you. It was so lovely to hear stories read in different languages and learn about children's favourite book characters. We are passionate about reading and prioritise time for daily, group, story sessions. Children learn about the features of books such as the title, author, illustrator, blurb. They are building an understanding that print conveys meaning as we point out particular words and notice things in the pictures but mainly we hope to develop a love of books, stories and reading!

We had a very generous donation of a French book about Petit Ours Brun (Little Brown Bear) that has kindly been translated into English for us.

Next Week 11th – 15th March

- We will be using different materials to create houses for the 3 little pigs. Which material will create the most stable house? How will we build it so that the pig can fit inside?
- Next week is British Science week so we will be enjoying experiments and investigations each day.
- We will be following a simple recipe to create chapatis.

Easter Raffle

Tickets for our Easter raffle are on sale from Monday 11th March. The money raised will go to resources for the nursery.

Key vocabulary

alliteration, inside, growing, beat, stable

At Home

- Use your £1 book token toward buying a new book or visit Maidenhead Library to enjoy their extensive range of books for free!

Ramadan Kareem to our families starting Ramadan at the weekend.
