Our Learning

This Week

12th October – 16th October 2026

This week our new 'Scuttlebug's' arrived! The children have had so much fun using them in the courtyard garden. It has been fascinating to see the different ways that our two-year old's are using the wheeled toys. Some like to push them, some use both legs to push forwards and some children have been using alternate legs! All of these movements are supporting our Pre-Nursery children's gross motor skills including core strength and balance.

The children have grown in confidence when climbing and jumping in our soft play. This week the adults have supported the children outside using our big tunnels. They have enjoyed crawling and climbing. We have modelled our visuals 'Safe' and 'Ready' to support them during their gross motor play.

Our Makaton signs of the week are:

More and

Help

At home

Our key words this week are…

Help, more, jump

Our key words next week are…

Autumn, outside, nature

Kerry Bennett, a health visitor writing for the BBC's Tiny Happy People says, "A 0-4 year old should ideally be doing "around 3 hours of physical activity a day, whether that's playing, or getting out for half an hour in the fresh air in the park, or digging in the back garden."
