Our Learning Adventures:
2nd - 6th November 2026

Here is some of this week's learning and exploring.

Listening to and identifying recorded common outdoor sounds helps us focus on sound differentiation for future phonics learning.

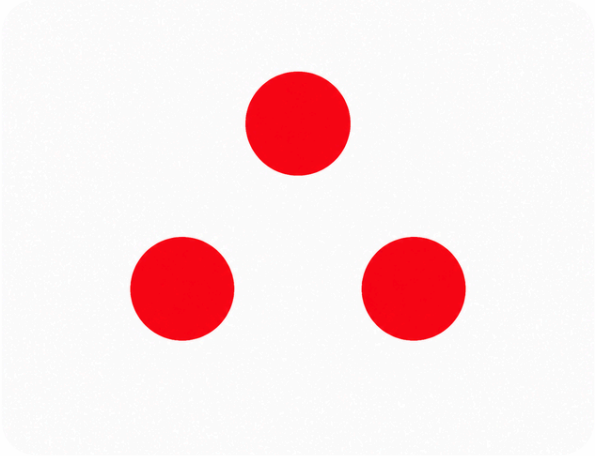

Our pumpkin collection gave us a fantastic opportunity to use vocabulary relating to shape, size, weight and texture.

We developed our shoulder and elbow movements, moving to Handel's Firework Music! We need our arms to be strong for moving with ease.

We remembered how to subitise to 3, asking 'what do you see?' We started to see groups within 3 - 1 and 1 and 1, 2 and 1.

We had lots of opportunuties to role play with our cauldrons and potions, pretending to be Meg and Mog and Winnie the Witch!

Next Week

We will be using our fine motor skills to tap golf tees into pumpkins, thread beads, use small construction equipment, place small pegs into peg boards and use one handed tools to manipulate play dough.

At Home

Listen to sounds around us when you are walking outside. Can your child identify what they are? There are sounds inside too,when we are very quiet, what can we hear?
